Subject: Ksolves successfully developed its Bigdata Product on NiFi – Data Flow Manager (DFM) which has been thoroughly tested and validated by a customer in the USA.

Regulation: Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements), Regulations, 2015.

Ref: BSE Scrip Code: 543599; NSE Symbol; KSOLVES; ISIN: INE0D6I01023

Dear Sir,

In accordance with the aforementioned regulation and with reference to the subject, we are pleased to inform you that Ksolves' Bigdata Product on NiFi, Data Flow Manager (DFM), has passed the rigorous testing from Billion Dollar Shipping & Packaging company in the USA ('the customer'). This USA based company acted as the Beta Customer for DFM and has been rigorously testing the product for the past four months. The solution has now been technically approved by them and the company is in the process of signing formal subscription agreement.

DFM is the fully automated CI/CD tool for NiFi and Data Flow Deployments. The successful testing from the billion-dollar shipping and packaging company in the USA serves as a strong testament to our expertise, innovation, and commitment to delivering superior service to our customers. With its exceptional and unique features, we are optimistic that this product will help expand our customer base in the coming years.

About the customer: A Billion-dollar shipping & packaging company in the USA, a leading distributor of shipping, packaging and industrial supplies, having more than 10 billion USD in Revenue. This company is a powerhouse in the shipping supplies and packaging industry, boasting a catalog of over 40,000 products. With more than 25 distribution centers strategically positioned across the country, it ensures unparalleled efficiency and reach. Its product lines have expanded to include retail, safety, material handling, industrial and packaging materials.

About Data Flow Manager (DFM): DFM is an intuitive UI-based tool to simplify the promotion of NiFi Flows across different environments. Organizations can create and test NiFi Flows in the development environment and seamlessly promote them to staging and production environments without writing Ansible scripts. The UI provides a comprehensive view of all NiFi clusters and associated flows running on each cluster. Organizations can choose the desired flow and its version to automatically deploy or upgrade it in a specific environment.

Key features of DFM:

- **Centralized Control** – Manage all NiFi and data flows from one centralized place
- **Advanced Security with RBAC** – Enterprise-grade security
- **Full Open-Source NiFi Support (1.X, 2.X)** – No vendor lock-in
- **Automated Scheduling, History & Rollback** – Full traceability and control
- **Flow Analysis & Generate Data flow using AI** – Quality control for your data flow & and Data flow generation using AI

This is for your information and records.

For and on behalf of Ksolves India Limited

**Manisha Kide
